CORE SKILLS

- Next.js / React
- TypeScript / JS
- Node.js / Express
- MongoDB
- Tailwind CSS
- REST API Design

TOOLS & TECHNOLOGIES

- Git & GitHub
- Stripe
- BetterAuth
- JWT
- Framer Motion
- Groq AI
- Gemini AI
- Vercel
- Postman
- VS Code

EDUCATION

BSc in CSE
Premier University, Ctg
1st Semester - 2025 – Present

LANGUAGES

- Bengali (Native)
- English (Professional)

PROFESSIONAL SUMMARY

Motivated Full Stack Developer with hands-on experience shipping production-ready web applications using Next.js, TypeScript, Express.js, and MongoDB. Passionate about solving real-world problems through clean architecture and seamless UX — from AI-powered healthcare tools to marketplace platforms.

WHAT I BRING

- Build & ship complete full-stack products independently — DB schema to polished UI.
- Integrate third-party APIs (Stripe, Groq AI, Google Gemini) in production environments.
- Write clean, maintainable TypeScript with RESTful API design & component-driven architecture.
- Fast learner who solves complex real-world problems through scalable technology.

FEATURED PROJECTS

MediMind AI

[Live Demo](#)

AI-powered clinical decision support platform featuring a Groq-based symptom checker with urgency scoring, Gemini AI medical document analyzer, and a drug interaction detector. Built with responsible AI guardrails to reduce preventable medical errors.

Next.js TypeScript Groq AI Gemini AI MongoDB BetterAuth

MediCon

[Live Demo](#)

Full-stack healthcare appointment platform for Bangladesh supporting multi-role auth (patient / doctor / admin), real-time slot management, and multi-criteria doctor search by specialty, location, and fee range.

Next.js TypeScript Express.js MongoDB BetterAuth

ArtHub

[Live Demo](#)

Online art marketplace where artists open studios, list original artworks, and sell to global collectors. Features Stripe Connect payments, JWT + BetterAuth dual auth, and category-based artwork filtering.

Next.js JavaScript Stripe JWT MongoDB Express.js
